

Weekly Disease Surveillance Report

2022 Reporting Week 45: November 6 — November 12

This weekly report is produced by the DOH-Okaloosa Epidemiology Section to provide situational awareness to community partners. Data is subject to change as additional information is gathered.

COVID-19 & ILI Trends

While Okaloosa has had another decrease this week for influenza-like illness (ILI), ILI continues to remain above the normal trend for this time of year (current level: 7.52%; normal average: 2.5-3.5%). We encourage providers to review the weekly [Florida FLU REVIEW](#) for statewide information and please continue to promote vaccination.

COVID-19 levels have plateaued for Okaloosa. **Recommended actions based on current COVID-19 Community Level:** Stay up to date with COVID-19 vaccines. Get tested if you have symptoms. People may choose to wear a mask at any time. People with symptoms, a positive test, or exposure to someone with COVID-19 should wear a mask.

MONKEYPOX (MPX)

The CDC urges healthcare providers to be vigilant for patients presenting to your facility with a [characteristic MPX rash](#), which can resemble and coexist with sexually transmitted infections (STIs). It is important to become familiar with [identification](#) and be prepared for [specimen collection](#). [MPX testing is available through commercial laboratories](#). Approval for testing is NOT required from the Department of Health (DOH) if testing through a commercial laboratory.

If UNINSURED patients need MPX testing, please contact DOH-Okaloosa at 850-833-9065 for consultation. The state laboratory will receive specimens for uninsured patients that meet specific criteria and are approved for testing by the DOH. Approval for testing is required from the DOH if testing through the state laboratory and is based on clinical presentation, exposure history, and timeline.

COVID-19 Snapshot

Week 45 Community Level

COVID-19 Community Level	New Hospital Admissions per 100K Population (Past 7 Days)	% Staffed Beds with COVID-19 Patients (Past 7 Days)
LOW	3.2	0.8%

PREVIOUS WEEK COMMUNITY LEVEL: LOW

New COVID-19 Cases Per 100,000 people in the past 7 days	Indicators	Low	Medium	High
Fewer than 200	New COVID-19 admissions per 100,000 population (7-day total)	<10.0	10.0-19.9	≥20.0
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	<10.0%	10.0-14.9%	≥15.0%
200 or more	New COVID-19 admissions per 100,000 population (7-day total)	NA	<10.0	≥10.0
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	NA	<10.0%	≥10.0%

Week 45 Community Transmission Level

COVID-19 Community Risk Level	New Cases per 100K Population per Week	% Positivity per Week
MODERATE	24.2	5.5%

PREVIOUS WEEK RISK LEVEL: MODERATE

Low	<10	<5.0%
Moderate	10-49	5.0 - 7.9%
Substantial	50-99	8.0 - 9.9%
High	>100	>10.0%

Community Level and Community Risk/Transmission Level are the color of the higher risk level for each of the two indicators. Data Source : CDC [Community Indicators at the County Level](#)

Influenza-Like Illness

Week 45: November 6 - November 12

Influenza-like Illness (ILI) is defined as fever greater than or equal to 100°F AND cough and/or sore throat in the absence of another known cause.

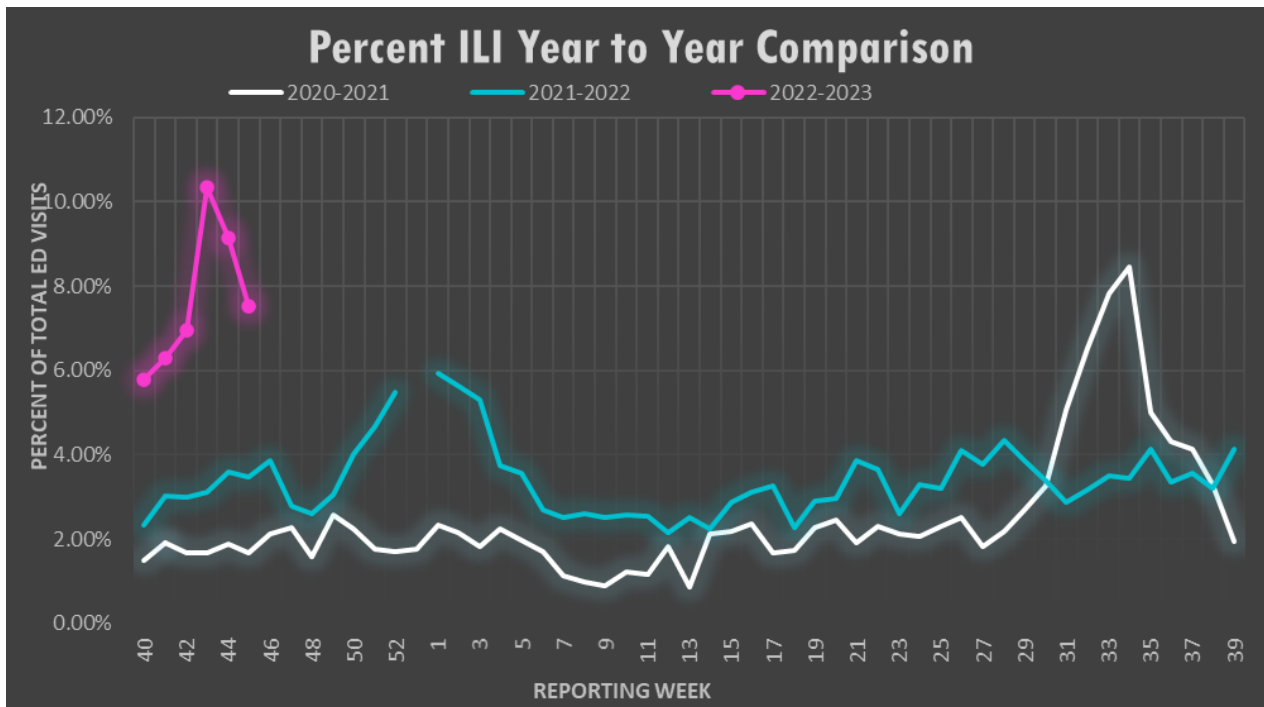

Figure 2: Annual comparison of the percent of all hospital ED visits due to ILI for Okaloosa county for the 2020-21, 2021-22 and 2022-23 influenza seasons by week. Data source: ESSENCE

ANALYSIS: During Week 45, flu reporting partners and ESSENCE (a syndromic surveillance system) reported a decrease in ILI activity for Okaloosa County. The percentage of ILI ED visits in Okaloosa County decreased from 9.16% during Week 44 to 7.52% during Week 45. Flu partners reported 69 positive rapid flu tests this week (68 Influenza A and 1 Influenza B). Over the past three weeks, 26 out of 27 influenza specimens submitted to the state lab were positive (25 Influenza A unspecified and 1 Influenza H3). There were no ILI admissions or deaths reported by flu partners this week; however, there were two outbreaks reported. The percentage of total ILI ED visits for Week 45 is higher than that of Week 45 last year.

Note: Other respiratory syndromes can be represented by increased ILI case numbers. Data Source: ESSENCE

% ILI by Age Group Week 45, 2022

Age Range	ILI Visits	Total ED Visits	% Total ILI Visits
0-4	66	282	23.40%
5-19	74	474	15.61%
20-34	29	592	4.90%
35-54	23	593	3.88%
55-74	15	553	2.71%
75+	4	307	1.30%
